Status	Finished
Started	Thursday, 30 October 2025, 12:46 PM
Completed	Thursday, 30 October 2025, 1:13 PM
Duration	27 mins 40 secs
Marks	2.08/3.00
Grade	2.08 out of 3.00 (69.44%)

Information

Information

This page contains all the problems for this test. The very last problem asks you to contact the person in charge of the exam and tell him or her the 4-digit key given in the problem text. In return you will be given a 5-digit signing code which you must give as the answer to the problem.

This problem does not count towards the final score, but **tests missing this code will not count towards the final grade.**

The following rules apply:

- Total time allowed: 30 minutes. The test will automatically close if time runs out.
- UiA's usual rules in regards to cheating on exams apply.

Question **1**

Correct

Mark 1.00 out of 1.00

Find the solution to the initial value problem

$$\begin{cases} a_n + 2 \cdot a_{n-1} - 3 \cdot a_{n-2} = 0 \\ a_0 = 1 \\ a_1 = -7 \end{cases}$$

$$a_n = 2 \cdot (-3)^n - 1 \cdot 1^n$$

Input your answer as a function of n . Any other variable is treated as a constant. E.g. if you think the answer is $2^n + 3$, you should enter **$2^n + 3$** .

Your last answer was interpreted as follows:

$$2 \cdot (-3)^n - 1 \cdot 1^n$$

The variables found in your answer were: $[n]$

Question **2**

Partially correct

Mark 0.33 out of 1.00

Consider $G = (\mathbb{Z}_7 \times \mathbb{Z}_{10})$, the direct product of the group $(\mathbb{Z}_7, +_7)$ and the group $(\mathbb{Z}_{10}, +_{10})$.

Recall that a subgroup $H \subseteq G$ is called *non-trivial* if $H \neq \{e\}$, and *proper* if $H \neq G$.

Select every statement below which is true, and leave the false statements unchecked.

- ☒ For all elements $a, b \in G$, the following is true: $ab = ba$.
- ☒ The only subgroups of G are the trivial subgroup $\{e\}$, and G itself.
- ☐ The group G is infinite.
- ☐ The order of G is 70.
- ☒ The group G is cyclic.
- ☐ None of the above

Question **3**

Partially correct

Mark 0.75 out of 1.00

In this problem you are tasked with computing products and inverses in the group $(P_{50}, \bullet_{50})$ of integers and multiplication modulo 50.

$$31 \bullet_{50} 33 = \boxed{23}$$

Your last answer was interpreted as follows:

23

$$33 \bullet_{50} 29 = \boxed{7}$$

Your last answer was interpreted as follows:

7

$$29 \bullet_{50} 41 = \boxed{39}$$

Your last answer was interpreted as follows:

39

$$31^{-1} = \boxed{19}$$

Your last answer was interpreted as follows:

19

Question **4**

Correct

Mark 0.00 out of 0.00

Signing code

Before closing the test you must answer this problem with a signing code given to you by the person in charge of the test.

Tests missing this signing code will be ignored and will not count towards the final score.

Key: **244**

Signing code:

Your last answer was interpreted as follows:

11122
